WHAT IS CLAIMED IS:

- 1. A composite cord having a $1 \times n$ construction (n is an integer from 3 to 12) with from 2 to 11 metallic filaments and from 1 to 5 polymer fibers having a melting point of from 50°C to 200°C twisted together.
- 2. The composite cord according to claim 1, wherein the metallic filament has a diameter of from 0.15 mm to 0.45 mm.
- 3. The composite cord according to claim 1, wherein the polymer fiber is selected from polyethylene fiber and polypropylene fiber.
- 4. A pneumatic tire employing for its reinforcing element a composite cord having a $1 \times n$ construction (n is an integer from 3 to 12) with from 2 to 11 metallic filaments and from 1 to 5 polymer fibers having a melting point of from 50°C to 200°C twisted together.
